

# List of Small Distribution Box Models

## Summary of Content

Small distribution boxes are compact, modular electrical enclosures designed for decentralized power, signal, and data distribution in buildings and industrial applications.

### Overview of Small Distribution Boxes

Small distribution boxes are used to distribute electrical power and signals close to the load, enabling flexible and decentralized installation. They are suitable for residential, commercial, and industrial environments, including smart buildings and automation systems. These boxes often comply with international standards such as IEC 61439 for electrical enclosures and IEC 61535 for connector systems.

### Popular Models and Series

- **Wieland Distribution Boxes:** Offer pluggable, decentralized solutions for energy, signal, and data distribution. They are designed for harsh environments, including moisture-prone areas, and allow for prefabrication and modular installation.
- **DISTRO-DIRECT Type 10 and Type 11 Series:** Compact modular boxes with options for various inputs and outputs, including protective breakers, Schuko plugs, and transparent labeling sleeves. These are suitable for flexible combinations and direct online purchase.
- **Eaton xComfort Compact Distribution Boxes:** Available in 1 to 5-row units, with 2 to 6 module configurations, optional windows, and connection terminals. They feature 3D plaster compensation, cable holders, and durable powder-coated steel enclosures.
