

# Lithuanian Distribution Box Procurement

## Summary of Content

Lithuanian distribution box procurement is conducted through official public procurement platforms, with current tenders accessible via the CVP IS system and specialized tender portals.

### Procurement Platforms

In Lithuania, all public procurement procedures, including those for electrical distribution boxes, are conducted electronically through the Central Public Procurement Information System (CVP IS), managed by the Public Procurement Office. This system is mandatory for all public procurements above and below European thresholds, except for certain low-value contracts under national law . The new CVP IS system has been active since December 1, 2024, and allows suppliers to view notices, submit bids, and access tender documents online .

### Current Distribution Box Tender

A recent tender for Electrical Distribution Boxes (125A and 63A) was issued by the Communications and Information Systems Battalion of Lithuania. The tender was published on 14 May 2026 and is scheduled to close on 21 May 2026. This is classified as a low-value purchase and includes a survey advertisement for interested bidders . Detailed tender information, eligibility criteria, and bidding documents can be accessed by registering on the relevant tender platform and referencing TOT Ref No. 141223726 .

### How to Participate

- Register on CVP IS: Suppliers must create an account on the CVP IS portal (<https://viesiejipirkimai.lt>) to participate in public procurement .
