

Low Voltage Cable Tray Thickness 200mm

Overview

Start with width, depth, and load profile: 200mm × 50mm galvanized steel suits 90% of indoor commercial runs; stainless steel or PVC makes sense only when environment or compliance dictates it. Skip the 'premium' finishes unless documented by spec sheets—not marketing copy. If you're specifying or installing cable management for commercial or light-industrial use, a 200mm wide perforated or ladder-type cable tray is now one of the most common mid-tier widths—and choosing the wrong variant wastes labor, invites future rework, and risks under-spec'd support. For typical. H=50mm, B=200mm, L=3000mm, D=1,5mm, roestvrijstaal 304, geschikt voor machinebouw en lichtlijnen. Mita, now Schneider Electric, is a specialist in the development and production of cable management systems. 5mm heavy gauge steel wire and finished with an electro zinc plating (EZ), it offers dependable support with corrosion resistance for indoor use.
