

Low-voltage distribution box n

Overview

LV distribution boards, part of the electrical distribution system, securely distribute low-voltage power to facility circuits. Integrated with ACBs and MCCBs, they provide protection from overloads, short circuits, and others. They also centralize power distribution monitoring and management for. Continuity is the guiding principle for these cabinets for distribution board assembly – from their high degree of protection and their ease of installation to a portfolio which can meet all requirements in the field. www.industrymall.com/lowvoltage/catalogs Refer to the Industry Mall for current prices www.industrymall.com The products and systems listed in this catalog are developed and manufactured using a certified quality management system in accordance with DIN EN ISO 9001:2008. The system assembly with its components are tested and verified.
