

MPO Adapter Module Low-Loss Door-to-Door Transportation

Overview

SENKO's MPO-PLUS® connector has the lowest insertion loss on the market thanks to its precision ferrules and superior guide-pin alignment. This enhanced performance gives network operators greater flexibility and extended reach when deploying data rates of 40G, 100G and beyond. Designed to unleash high-speed data center capabilities, MPO Cable Assemblies and Adapters use high-density MTP and MPO-style connectors to deliver streamlined connectivity, high port density, superior loss performance and simplified maintenance for the high-bandwidth networks of tomorrow. The. An MPO adapter (also called an MPO coupler) is a passive fiber optic component used to connect two MPO connectors together. This ensures a stable and accurate connection, allowing optical signals to pass between them with low loss. This Hybrid Adapter serves as the ideal choice for.
