

Maldives Special Optical Cable Price ADSS

Summary of Content

ADSS fiber optic cable prices typically range from \$0.25 to \$1.20 per meter depending on core count, span length, and environmental specifications.

Price Overview

The cost of ADSS cables varies significantly based on fiber core count, cable structure, span length, and protective features. For example, a 12-core ADSS cable for short spans (≤ 100 meters) with a standard double PE jacket may cost around \$0.25–\$0.35 per meter, while a 48-core cable for long spans (≥ 500 meters) with reinforced aramid yarn and tracking-resistant jackets can reach \$0.90–\$1.20 per meter. Prices also increase for armored, water-resistant, or LSZH-sheathed cables.

Factors Affecting Cost

- **Core Count:** More fibers increase material and manufacturing costs. Single-core cables are cheaper, while multi-core cables support higher data capacity.
- **Span Length:** Longer spans require higher tensile strength and reinforced structures, raising the price.
- **Environmental Resistance:** UV resistance, water-blocking, and extreme weather protection add to cost.
- **Material Type:** PE jackets are economical, while LSZH or double-jacket designs are more expensive but offer better durability.
- **Installation Complexity:** Overhead installation in hard-to-reach areas or near power lines may increase labor costs.
