

Manufacturer s 24-core optical cable splice box

Overview

GJS-24-D (PLC) 24 Cores SC fiber optic joint closure is a kind of small junction box that is used to join the fiber bundles and protect them during cabling installation, preventing the cables from abrasion and other damage. The splice tray ST series manufactured by LongXing are used. Splice tray is used in optical distribution frame, distribution box, and splice closures, which is engineered for use with indoor or outdoor splice hardware with both loose tube and tight-buffered optical cable designs. It has many advantages: excellent waterproof performance, lightweight, small. High Capacity Options: Available in 24, 96, and 144 core configurations with a maximum capacity of 72 cores per unit. Quality Assurance: Strict quality control with pre-production samples and final inspections before every shipment. Fiber optic splice closure features: 1.
