

Mauritania s 24-core smart building fiber optic cable brand

Summary of Content

Mauritania is expanding its international fiber optic connectivity through the EllaLink submarine cable system, with Alcatel Submarine Networks handling the subsea construction.

Overview of the Project

Mauritania has signed an agreement with EllaLink to construct, operate, and maintain a second international subsea cable directly connecting the country to Madrid, Spain. This project includes a 500 km branch from a new Cable Landing Station in Nouadhibou, Mauritania's second-largest city, linking into EllaLink's transatlantic infrastructure . The subsea section will feature two fiber pairs and advanced optical technologies, including a ROADM WSS branching unit, designed to provide low-latency, high-capacity connectivity .

Technical and Operational Details

- Construction: Managed by Alcatel Submarine Networks, a leading global provider of submarine cable systems .
- Capacity: The initial deployment will deliver 200 Gbps direct circuits between Nouadhibou and EllaLink's Point of Presence in Madrid, with scalability for future growth over 25 years .
- Technology: The system uses state-of-the-art optical coherent technologies, ensuring secure, high-capacity, and low-latency transatlantic connectivity .
- Timeline: Construction has started, with service expected by early 2027 .
