

Metal cable trays made of aluminum alloy

Overview

An aluminum cable tray is a metallic support system made from 6061-T6 or 5052 aluminum alloy, designed to route and protect power and communication cables. It combines light weight, high strength, and excellent corrosion resistance, making it ideal for both indoor and outdoor. What are the main types of cable trays available for wholesale orders?

The Aluminum Alloy Cable Tray is classified under our comprehensive Cable Tray range. When searching for cable. Discover aluminum alloy cable trays that are lightweight, corrosion-resistant, and optimize heat dissipation for safe, long-lasting cable management. Why Choose Aluminum Alloy Cable Trays?

1. Lightweight and High Strength 2. Superior Corrosion Resistance 3. The selection of the proper material is essentially an economic consideration. A wide range of brackets, splices and accessories are available.
