

Middle East BBMD Explosion-proof Lighting and Power Distribution Box

Overview

These units allow multiple portable lighting circuits to be safely split from a single power source, making them essential for large-scale shutdown and turnaround operations in Zone 1 and Zone 2 classified areas across oil and gas, refinery, petrochemical, and offshore facilities. These units allow multiple portable lighting circuits to be safely split from a single power source, making them essential for large-scale shutdown and turnaround operations in Zone 1 and Zone 2 classified areas across oil and gas, refinery, petrochemical, and offshore facilities. Daly Middle East supplies a premium range of ATEX certified, explosion-proof, and industrial-grade lighting solutions engineered for the most demanding applications across the GCC region. Whether you operate in oil & gas facilities, petrochemical plants, offshore platforms, refineries, or heavy. Classes define the general nature of the hazardous material that may be in the surrounding atmosphere. Class I Locations are those in which inflammable gases or vapours are or may be present in sufficient quantities to produce a fire or explosion if ignited. Our solutions meet the strictest international standards, including ATEX Certified Lights. ATEX and IECEx certified splitter boxes and power distribution units for safe power distribution in explosive atmospheres.
