

Mobile Communication Optical Distribution Box for Disassembly

Summary of Content

Disassembling a mobile communication optical distribution box involves carefully removing the cover, securing fiber cables, and accessing internal splice trays and protective elements.

Preparation and Safety

Before disassembly, ensure the following:

- Power and network safety: Confirm that the optical network is inactive to prevent accidental damage or signal loss.
- Clean workspace: Use lint-free cleaning tissues and maintain a dust-free environment to protect fiber ends from contamination .
- Tools required: Screwdrivers for bolts (commonly M5x12 or M6x10), cable ties, and protective gloves .

Step-by-Step Disassembly

- Remove the outer cover:
- Unlock the main and side locks of the ODB.
- Carefully lift or slide the front panel to expose the internal components .
- Secure and identify cables:
- Identify feeder and drop cables entering the box. Feeder cables usually enter the center port, while drop cables enter from the sides

Article Content
