

Moldova Optical Module Major Manufacturers

Summary of Content

Moldova currently has distributors and optical companies like Opticlux Ltd. and Interoptic, but dedicated optical module manufacturing is limited, with most production sourced internationally.

Key Moldovan Companies

Opticlux Ltd. is a leading distributor of optical and ophthalmology products in Moldova, established in 1992. They provide a wide range of optical equipment, lenses, and contact correction services, and collaborate with international manufacturers such as CIBA VISION®, Reichert, Optopol, and EssilorInternational . While they are a major player in the Moldovan optical market, they primarily act as a distributor rather than a manufacturer of optical modules. Interoptic is one of Moldova's largest optical companies, offering over 5,000 models of frames and sunglasses. They also distribute optical lenses and related products from international brands . Their operations focus on retail and distribution rather than in-house optical module production.

Optical Module Buyers and Market Activity

Moldova has a significant import market for optical modules. According to Volza, there are 484 verified buyers of optical modules in Moldova, with companies like DRA DRAEXLMAIER AUTOMOTIVE S.R.L., RE SERVE SRL, and LLC CEGOLTAR accounting for a large share of imports . This indicates a strong demand for optical modules, even if local manufacturing is limited.

International Collaboration and Design
