

NAS Home AI Server

Overview

Build a dedicated home AI server that runs 24/7 — serving LLMs to every device on your network. Hardware picks, networking, storage, remote access, and multi-user setup for families, teams, and tinkerers. Last updated: March 3, 2026. All hardware recommendations tested and validated. Find the right pick for your home lab. Why use a NAS instead of cloud storage?

A NAS gives you full control, privacy, and no recurring storage fees. 1 NAS devices are becoming genuine private AI infrastructure nodes — capable of running Docker containers, local LLMs, and AI-powered photo. Eva Wong is the Technical Writer and resident tinkerer at ZimaSpace. A lifelong geek with a passion for homelabs and open-source software, she specializes in translating complex technical concepts into accessible, hands-on guides. In 2026, the NAS — Network Attached Storage — is no longer just a box of hard drives that sits on your shelf serving files.
