

Namibia Technical Support Network Security Device 100G

Summary of Content

Namibia offers both local IT service providers and international support options for 100G network security devices, including maintenance, software updates, and managed services.

Local IT Support Providers

Datacom Namibia is a fully Namibian-owned IT company providing comprehensive ICT services to corporate clients, including network management and technical support. Amana Technology offers a full portfolio of hardware, security management, software, and network connectivity services. They provide end-to-end solutions from planning and implementation to ongoing management, including support for enterprise-grade network devices. M1 Technologies specializes in fast on-site and remote IT support, hardware repairs, network troubleshooting, and managed IT services in Windhoek, making them a reliable option for maintaining 100G network infrastructure. PEKTECH Information Technologies provides personalized IT services, including networking solutions, CCTV systems, and fleet management, with tailored quotes and support for high-speed network devices.

International Support for 100G Devices

For 100G network packet brokers, FS.com offers PicOS® Standard Maintenance & Support, which includes technical support, software updates, and upgrades, as well as email and phone support per device. Service contracts are available for 1, 3, or 5 years, ensuring continuous device management and security compliance.
