

Nauru power distribution box size representation

Summary of Content

Nauru power distribution boxes are prefabricated, modular units designed for 10/0.4kV networks, with robust construction, IP23D-IP55 protection, and transformer capacities ranging from 50 kVA to 1600 kVA.

General Overview

Nauru power distribution boxes, including ZBW-type prefabricated substations and JP outdoor integrated distribution boxes, are complete sets of distribution equipment combining high-voltage switchgear, distribution transformers, low-voltage switchgear, energy metering, and power factor compensation devices in one or multiple enclosures . They are suitable for urban buildings, industrial sites, airports, and data centers, providing safe, reliable, and compact power distribution.

Structural Features

- Base Frame: Welded channel steel for high strength and rigidity .
- Enclosure Material: Composite materials with strong radiation resistance or 2 mm galvanized steel sheet for outdoor cabinets .
- Roof Design: Slightly slanting with 50 mm overhang to prevent water ingress .
- Protection Level: IP23D for standard prefabricated substations; IP55 for LT distribution boxes .
- Earthing: Two solid earthing points on either side .
