

New Zealand electrical distribution box brand manufacturer

Summary of Content

Key manufacturers of electrical distribution boxes in New Zealand include Trical, Built Boards, Spectrum, and Gyroplastics, offering both standard and custom switchboard enclosures.

Leading Manufacturers

Trical is one of New Zealand's most established suppliers, with over 60 years of experience. They manufacture electrical enclosures and switchboards under brands such as Gael, Teubel, Signet, and ETL, serving industrial, commercial, and residential markets. Trical emphasizes New Zealand-made quality and offers a purpose-built facility for consistent production and engineering support. Built Boards specializes in metal switchboard enclosures, outdoor electrical boxes, and electric switchboards. They provide both standard and customized solutions, including stainless steel and powder-coated options. While some manufacturing occurs in Australia, they cater extensively to the New Zealand market and can produce custom boards to meet specific power requirements. Spectrum offers a range of industry-standard electrical cabinet sizes and custom switchboard enclosures. They provide full design and build services for complex projects and supply pre-finished pillar boxes commonly seen across New Zealand. Gyroplastics manufactures high-quality distribution cabinets and link pillars in-house, serving the electrical distribution, EV charging, OEM, and wholesale sectors. Their products are designed for durability and compliance with industry standards.
