

Nigerian CIF price bend-insensitive fiber optic cable 24 cores

Summary of Content

The estimated CIF price for a 24-core bend-insensitive fiber optic cable in Nigeria is approximately \$17-\$20 per kilogram, based on recent import data and market trends.

Import Price Overview

In 2024, the average import price for optical fiber cables into Nigeria was \$16,908 per ton, reflecting a 35% increase from the previous year, largely influenced by global demand and supply from China. This translates roughly to \$16.9 per kilogram, which serves as a baseline for CIF pricing, including shipping and insurance costs.

Local Market Pricing

Retailers in Nigeria offer multi-core fiber optic cables, though most online listings focus on 8-core and 12-core cables. Prices for smaller cores start from ₦3,450, but for higher-core cables like 24-core, prices are typically higher due to increased material and manufacturing costs. Bend-insensitive cables, which reduce signal loss in tight bends, may carry a premium of 10-20% over standard fiber cables.

Estimating CIF for 24-Core Bend-Insensitive Cable

- Base import cost: ~\$16.9/kg
 - Bend-insensitive premium: +10-20% → ~\$18-\$20/kg
 - CIF considerations: Includes shipping, insurance, and port handling to Nigeria.
- Actual CIF may vary depending on supplier, shipping route, and order volume.
