

Nordic Stainless Steel Cable Tray Specifications

Summary of Content

Nordic Stainless Steel Cable Trays are high-quality, corrosion-resistant wire trays designed for industrial and harsh environments, offering customizable dimensions, long bracket spacing, and compliance with IEC 61537.

Material and Durability

Nordic stainless steel cable trays are made from first-class stainless steel, providing excellent resistance to corrosion, salt, and pollution, making them ideal for offshore facilities, wastewater treatment plants, and other harsh environments. The trays are designed for long-term durability and can withstand mechanical stresses without compromising safety.

Dimensions and Customization

- Length: Standard trays are typically 3000 mm, but custom lengths are available.
- Width: Ranges from 25 mm to 600 mm.
- Height: Ranges from 25 mm to 125 mm.
- Bracket Spacing: X-Tray cable trays feature the longest spacing between support brackets in the market, reducing the number of parts and installation time.
- Custom Solutions: Nordic Wire Tray can customize trays to meet specific project requirements, including bending, cutting, and shaping for unique installations.
