

North Asia Aluminum Alloy Cable Tray Price

Summary of Content

Aluminum alloy straight cable tray prices in North Asia vary widely depending on material grade, size, load capacity, and supplier, typically ranging from \$15 to \$50 per meter for standard 6063-T6 alloy trays.

Factors Affecting Price

Material and Alloy Type: Most high-quality trays use 6063-T6 aluminum alloy, known for its strength, corrosion resistance, and lightweight properties, which is standard in industrial applications. Premium alloys or thicker gauge trays increase cost.

Design and Dimensions: Prices differ based on tray type—ladder, perforated, or solid-bottom—and width, height, and length. Wider or heavier-duty trays designed for high load capacities cost more.

Supplier and Purchase Volume: Factory-direct or OEM suppliers in China and North Asia often offer competitive pricing, especially for bulk orders. Wholesale purchases can reduce per-meter costs significantly.

Verified suppliers on platforms like Alibaba or Made-in-China provide options for both standard and customized trays.

Certifications and Standards: Compliance with CE, ASTM B221, GB/T 23639-2009, or CECS 31-2011 may slightly increase cost but ensures quality and safety for industrial installations.

Typical Price Range

- Standard straight aluminum alloy trays (6063-T6): \$15–\$30 per meter for light to medium-duty applications.
- Heavy-duty or wider trays: \$30–\$50 per meter.
