

ODF fiber optic cable mounting price

Summary of Content

ODF fiber optic enclosures typically range from \$50 to \$300 for standard wall or rack-mount units, with prices varying by port capacity, type, and features.

Price Range by Type and Capacity

- **Wall-Mount ODFs:** Compact enclosures for indoor use, supporting 12 to 48 ports, generally cost \$50–\$150 depending on the number of ports and security features like lockable doors (e.g., BISMOM 48-core wall mount ODF) .
- **Rack-Mount ODFs:** Standard 19-inch rack units, available in 1U, 2U, 3U, or 4U sizes, supporting 12 to 72 ports, typically range from \$100–\$300. Higher-density units with sliding drawers or pre-terminated cables may be at the upper end of this range .
- **Pre-Terminated ODFs:** Units with pre-installed fiber connectors and cables can cost more due to faster installation and guaranteed performance, often \$200–\$400 depending on port count and cable type .

Factors Affecting Price

- **Port Capacity:** More ports (24, 48, 72) increase the cost due to additional splice trays and adapters.
- **Mounting Type:** Wall-mount enclosures are generally cheaper than rack-mount units.
- **Material and Build Quality:** Cold-rolled steel construction with electrostatic coating provides durability and may increase price.
- **Additional Features:** Sliding drawers, cable management rings, and lockable doors add to the cost.
