

ODF rack and optical fiber distribution box

Overview

Rack-mount, wall-mount, and sliding patch panels for high-density fiber management — 12 to 288 ports. A fiber optic patch panel — also called an Optical Distribution Frame (ODF) — is the backbone of any structured fiber cabling system. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. OTRANS strives to provide you with professional, reliable. Streamline your fiber connectivity with our premium Fiber Optic Patch Panels and ODF systems. Netceed offers a complete range of fibre distribution solutions, including fibre distribution boxes, optical distribution frames (ODF), and pre-terminated fibre optic. ODF fiber optic distribution frame, also known as fiber optic distribution cabinet, is a distribution equipment used for terminating, protecting, connecting, and managing optical cables and fibers in fiber optic communication networks.
