

Optical Module SRV

Overview

The EM800-SRV Supervisory module is part of the Fiber Driver-LD (LambdaDriver®) product line and can be hosted by the LambdaDriver chassis. The optical module serves as a crucial component in optical fiber communication systems, operating at the physical layer, which is the lowest layer in the OSI model. Its primary function is to achieve optoelectronic conversion by converting electrical signals into optical signals and vice versa. In Madrid, on February 27, 2025, the two companies unveiled the world's first commercial deployment of 800G coherent optical modules integrated with SRv6 in an IP backbone network. This upgrade could totally change how high-capacity networks handle speed, scale, resilience, and security.
