

Paraguay Temporary Level 3 Power Distribution Box

Summary of Content

A temporary Level 3 power distribution box in Paraguay is a portable, rugged unit designed to safely distribute electricity for industrial, construction, or emergency applications, with multiple outlets, circuit protection, and outdoor-rated enclosures.

Overview

Temporary power distribution boxes, also known as portable distribution units, are engineered to provide safe, flexible, and reliable electricity in locations where permanent power infrastructure is unavailable or under maintenance. These units are widely used in construction sites, industrial projects, events, and emergency response situations .

Key Features

- **Amperage and Voltage Ratings:** Level 3 boxes typically support higher loads, often ranging from 100 to 400 amps, with multiple voltage options including 120V, 208V, and 240V, depending on the application .
- **Circuit Protection:** Equipped with adjustable circuit breakers, GFCI protection, and high-voltage shutoff features to prevent overloads, open neutral, and reverse phase conditions .
- **Environmental Ratings:** Outdoor units are commonly rated NEMA 3R, providing protection against rain, sleet, snow, and external ice formation, while indoor units use NEMA 1 enclosures .
