

Peru Cable Tray Specifications and Models

Summary of Content

Cable trays in Peru are available in various types and materials, including ladder, perforated, solid-bottom, wire mesh, and channel trays, made from galvanized steel, stainless steel, aluminum, and fiberglass to meet industrial and commercial standards.

Types of Cable Trays

- **Ladder Cable Tray:** Features two side rails connected by rungs, ideal for heavy-duty cables and long spans. Commonly used in industrial and commercial installations for power and control cables .
- **Perforated Cable Tray:** Solid-bottom trays with perforations for ventilation, preventing overheating and allowing easy cable management. Suitable for medium-weight cables and environments requiring airflow .
- **Solid-Bottom Cable Tray:** Provides full support and protection for cables, ideal for sensitive or high-voltage installations where dust or debris protection is critical .
- **Wire Mesh (Basket) Tray:** Lightweight, flexible, and open mesh design, excellent for telecommunication and fiber optic cables. Allows easy installation, inspection, and airflow .
- **Channel Cable Tray:** U-shaped or channel-like structure, compact and cost-effective for light cable loads and confined spaces .
