

Poland Weak Elevator Type Cable Tray Manufacturer

Summary of Content

Poland has several manufacturers offering cable trays suitable for light-duty or weak elevator applications, including BAKS, B-group, DACPOL, and Brilltech Engineers.

Key Manufacturers

BAKS BAKS has been designing and manufacturing professional cable route systems since 1986. They offer a wide range of cable trays, including solutions for light-duty installations. Their products are certified for fire safety (E-30, E-90) and are designed for easy installation and high durability. BAKS provides online tools for load simulation and cable filling, which can help select appropriate trays for weak elevator applications . **B-group** B-group specializes in cable trays for office and industrial environments. Their trays support both vertical and horizontal routing and are made from high-quality materials ensuring longevity. They also offer a variety of accessories to optimize cable management, which can be adapted for light-load elevator systems . **DACPOL** DACPOL provides halogen-free and PVC cable trays, including Noryl, Betaduct, and Iboco products. These trays are used in rail, automotive, offshore, and energy industries, and their lightweight options can be suitable for weak elevator installations. DACPOL emphasizes safety and compliance with strict norms, making them a reliable choice for sensitive environments . **Brilltech Engineers** Brilltech Engineers offers durable cable trays in galvanized steel, stainless steel, and fiberglass. Their perforated trays promote airflow and prevent overheating, which is beneficial for elevator systems with limited load requirements. They provide installation support and system design assistance, ensuring proper selection for weak elevator applications .
