

Power Distribution Box Made in France

Summary of Content

France offers a range of high-quality power distribution boxes suitable for industrial, commercial, and construction applications, manufactured by companies such as GEYA, CENCO, and Marechal.

French Manufacturers and Products

GEYA provides modular low-voltage power distribution solutions for industrial environments, including factory production lines. Their HA series distribution boxes feature IP65-rated ABS enclosures, DIN-rail mounting, and modular components like MCBs, RCBOs, and RCCBs for overload, short-circuit, and leakage protection. These boxes are designed for easy installation, maintenance, and expansion, making them suitable for complex production systems such as washing machine factories . CENCO specializes in turnkey socket distribution boxes for construction sites and industrial applications. Their products are assembled, wired, and tested in France, offering pre-configured or custom solutions with CEE and Schuko® sockets. CENCO emphasizes robustness, versatility, and rapid deployment, supporting sectors like construction, workshops, and local authorities . Marechal produces industrial plugs and special distribution boxes with high protection ratings (IP-rated, waterproof, dustproof) for demanding environments such as petrochemical plants, nuclear facilities, and industrial maintenance. Their boxes are fully configurable, allowing additional sockets, longer cables, and custom labeling, ensuring safety and adaptability for professional use . ELC is a French manufacturer focused on low-voltage power supplies, function generators, and decade boxes, primarily for R&D, education, and industrial applications. While not strictly a distribution box manufacturer, ELC's expertise in electrical components supports specialized power distribution solutions .

Key Features of French-Made Distribution Boxes
