

Preventing optical cables from getting snagged while crossing the road

Overview

Heavy-duty cable ramps with hinged lids and reinforced load-bearing capacity are ideal for industrial and vehicular applications, while low-profile floor covers work well in offices or retail environments. When installing a cable protector, ensure the path is clean and flat. Lex Products PowerRAMP® crossovers protect hoses and cables from pedestrian or vehicle traffic damage where they run across roads, parking lots, sidewalks and pathways. No longer do you have to worry about disturbing the. Common damage to coaxial cables is caused by: Dropover cable guards are convenient for indoor applications, however fully-enclosed cable protectors are better suited for heavier-duty outdoor applications where vehicles and equipment will be passing over cable set-ups on job sites or other temporary. Cable protectors are an essential safety solution in any environment where power cords, hoses, or data cables cross walkways or drive paths. From warehouses and job sites to events and studios, they serve two main purposes: preventing trip hazards for people and protecting cables from damage caused. Put the proven Brahman Systems to work for you to improve safety, security and eliminate the cost and labor of burying cables, wires and hoses underground, stringing lines overhead or inconveniently directing traffic away from potentially dangerous high-pressure lines or electrical wire.
