

Price List for Trapezoidal Cable Trays in South Asia

Summary of Content

Trapezoidal cable tray prices in South Asia range widely from approximately \$2 to \$25 per meter, influenced by material, coating, supplier, and order volume, with India being the dominant market hub.

Market Overview

The South Asian cable tray market is growing rapidly due to urbanization, industrial expansion, and energy infrastructure projects, with India, Pakistan, Bangladesh, Sri Lanka, Nepal, and Bhutan as key markets. India accounts for the largest share of both production and consumption, supported by local manufacturers and multinational suppliers. The market includes ladder-type, solid-bottom, wire mesh, and trapezoidal trays, with material choices primarily being steel, aluminum, and stainless steel, selected based on load requirements, corrosion resistance, and installation environment.

Pricing Factors

- **Material Costs:** Steel (galvanized or stainless) and aluminum are the main materials. Steel is cost-effective and durable, stainless steel resists corrosion but is pricier, and aluminum is lightweight but more expensive than steel.
- **Coatings and Surface Finish:** Hot-dip galvanization (HDG) and powder coatings increase durability and corrosion resistance, affecting upfront costs.
