

Price for repairing bridge arch openings

Overview

Full-arch fixed bridge (multiple teeth): \$8,000-\$26,000+ for the arch, depending on units and material. Note: Most patients pay a total for a multi-tooth bridge rather than per tooth, and costs can vary by region and dentist, with higher esthetic and material choices driving. Costs for bridge work vary widely by type, span, and location. The price is driven by bridge type (private, municipal, or highway), span length, structural material, and access constraints. This guide presents cost ranges in USD and highlights key pricing factors to help buyers estimate a project. Replacing a bridge is a large-scale project with costs driven by size, location, design, and permitting. using converted metric data ESTIMATED 2024 REPLACEMENT AND REHABILITATION COSTS OF POOR NATIONAL HIGHWAY SYSTEM (NHS) BRIDGES * Year of the National Bridge Inventory data set used is the 2024 archive, see. The following tabular data provides some general guidelines for structure type selection and its relative cost.
