

Price of 12-core drop fiber optic cable clamp

Summary of Content

The price of a 12-core drop fiber optic cable clamp typically ranges from \$1 to \$5 per unit, depending on material, design, and supplier.

Overview

A 12-core drop fiber optic cable clamp is used to securely attach and support fiber optic cables in FTTH (Fiber To The Home) or drop cable installations. These clamps are designed to provide mechanical stability, prevent slippage, and protect the fiber from stress, torsion, and environmental factors ().

Materials and Types

- Aluminium alloy clamps: Lightweight, corrosion-resistant, suitable for long-span overhead installations ().
- Steel clamps with adjustable mechanisms: Durable, allow fine-tuning of cable tension, ideal for medium-tension applications ().
- Stainless steel clamps: Often used for flat fiber cables, providing high corrosion resistance and long-term reliability ().
- Thermoplastic or UV-resistant clamps: Common for general-purpose drop cable installations, cost-effective and weather-resistant ().

Packaging and Supplier Notes

- Clamps are often sold in packs of 25 or 50 units, with bulk orders available for larger projects ().
