

Price of Tonga Large-Span Fireproof Cable Tray

Summary of Content

The price of Tonga Large-Span Fireproof Cable Trays varies widely depending on material, size, and customization, typically ranging from \$50 to \$200 per meter, with exact quotes available from suppliers.

Overview

Tonga Large-Span Fireproof Cable Trays are designed for industrial and commercial applications requiring high load-bearing capacity and fire resistance. They are commonly used in subways, airports, railway stations, petrochemical plants, and large industrial facilities . These trays are available in materials such as galvanized steel, stainless steel, aluminum, and FRP, and can be customized in width, height, and perforation type to suit specific project requirements .

Factors Affecting Price

- **Material:** Stainless steel and FRP trays are generally more expensive than galvanized steel or aluminum due to corrosion resistance and durability .
- **Span and Load Capacity:** Large-span trays designed to support heavier cable loads cost more because of reinforced structural design .
- **Customization:** Custom widths, heights, or special coatings (e.g., powder-coated, hot-dip galvanized) can increase the price .
- **Quantity and Supplier:** Bulk orders may reduce per-meter cost, while small trial orders may incur additional fees .
