

Price of a half-section cable tray

Summary of Content

A half-section cable tray (approximately 1.2 meters) typically costs around half the price of a standard 2.4-meter tray, which ranges from \$50 to \$120 depending on material and type.

Estimated Pricing

Cable trays are commonly sold in standard lengths of 2.4 meters for hot-dip galvanized ladder types, with prices ranging roughly \$50 to \$120 per full section depending on supplier, material quality, and finish . A half-section (1.2 meters) would therefore cost approximately \$25 to \$60, though exact pricing may vary based on:

- Material: Steel, stainless steel, aluminum, or PVC; aluminum tends to be lighter but more expensive per unit .
- Type: Ladder, wire mesh, basket, or single rail; ladder trays are common for heavy power cables, while wire mesh trays are lighter and cheaper .
- Finish: Hot-dip galvanized, electro-galvanized, or stainless steel; corrosion-resistant finishes may increase cost .
- Supplier and bulk orders: Prices can vary significantly between distributors and may decrease with bulk purchases .

Additional Considerations

- Installation efficiency: Cable trays are generally faster to install than conduit systems, which can reduce overall project costs even if the tray itself is slightly more expensive .
