

Price of cable tray relocation and climbing bend

Summary of Content

Cable tray relocation and climbing bends typically cost between \$5 to \$50 per meter or per fitting, depending on material, complexity, and labor.

Cable Tray Relocation Costs

Relocating cable trays involves deconstructing, redesigning, and reinstalling the tray system. Labor is a significant portion of the cost, as technicians must carefully remove existing trays, adjust supports, and reinstall them in the new layout. For professional relocation services, prices vary based on project size, complexity, and location, but typical costs can range from \$10 to \$30 per meter for standard steel or aluminum trays, including labor and basic supports. More complex relocations in industrial or high-density environments may increase costs.

Climbing Bend Costs

Climbing bends are fittings used to change the vertical direction of a cable tray. Prices depend on the material and size of the tray:

- Steel ladder trays: \$5-\$25 per meter; climbing bends are usually priced per piece, often \$20-\$50 each for standard sizes.
- Aluminum trays: \$6-\$30 per meter; bends may cost slightly more due to material and corrosion resistance.
- FRP or stainless steel trays: \$10-\$50 per meter; climbing bends can be \$40-\$70 each, reflecting higher durability and environmental resistance.
