

Price of construction site plugs and distribution boxes

Summary of Content

Construction site plugs and distribution boxes typically range from \$50 to \$500 depending on type, capacity, and features.

Price Overview

- Basic portable distribution boxes with 110V or 220V input, 4–6 sockets, and IP44–IP65 waterproof rating generally cost \$50–\$150. These are suitable for small construction sites or temporary setups and often include built-in circuit breakers for safety (Amazon, Made-in-China) .
- Medium-duty distribution boxes with higher amperage (up to 60A), multiple branch circuits, and enhanced protection features like leakage circuit breakers or multifunctional meters are priced around \$150–\$300 .
- Heavy-duty or industrial-grade distribution boards designed for three-phase power, robust metal or thermoplastic enclosures, and compliance with IEC standards can cost \$300–\$500 or more, depending on customization, number of outlets, and additional monitoring features (DirectIndustry, Alibaba) .

Factors Affecting Price

- **Material and Build Quality:** Metal enclosures (sheet steel, powder-coated) are more expensive than plastic or fiberglass boxes but offer higher durability and impact resistance .
- **Number of Sockets and Amperage:** More sockets and higher current ratings increase cost. Boxes with 60A capacity or multiple branch circuits are pricier .
