

Price of empty plastic electrical distribution boxes at construction sites

Summary of Content

Empty plastic electrical distribution boxes typically range from \$15 to \$150 depending on size, protection rating, and industrial specifications.

Typical Price Range

For standard empty plastic distribution boxes used in construction sites, prices generally start around \$15–\$30 for small residential or basic enclosures and can go up to \$100–\$150 for larger, industrial-grade boxes with higher protection ratings and robust construction. Premium models with IP65–IP67 ratings, flame-retardant materials, and reinforced housings for outdoor or harsh environments are at the higher end of this range.

Factors Affecting Price

- **Size and Capacity:** Larger boxes that accommodate multiple circuits or breakers cost more due to increased material and manufacturing complexity.
- **Protection Rating (IP Rating):** Boxes with higher ingress protection (IP65–IP67) against dust and water are more expensive.
- **Material Quality:** Chemical-resistant, UV-stabilized, or flame-retardant plastics increase durability and price.
- **Brand and Certification:** Reputable brands and compliance with standards like IEC 61439 or EN 61439-1:2011 can add to cost.
- **Accessories and Features:** Inclusion of DIN rails, sealing plugs, transparent covers, or pre-drilled mounting options can influence pricing.
