

Price of fire-resistant cable trays in Peru

Summary of Content

Fire protection cable trays in Peru typically range from \$20 to \$150 per meter depending on material, type, and certification.

Market Overview

The Peruvian cable tray market is growing due to infrastructure expansion in mining, energy, and construction sectors, which drives demand for fire-resistant and corrosion-resistant cable management solutions. Key product types include ladder-type trays, solid-bottom trays, trough trays, wire-mesh trays, and channel systems, each designed for specific load capacities, ventilation needs, and environmental exposure. Specialized fire protection trays often command higher prices due to FM or UL certifications and enhanced durability.

Pricing Insights

- Standard fire-resistant cable trays: Prices for basic galvanized steel or aluminum trays start around \$20–\$50 per meter for smaller commercial or residential projects.
- Premium or industrial-grade trays: Fiberglass-reinforced polyester or heavy-duty corrosion-resistant trays used in mining or energy facilities can cost \$100–\$150 per meter or more, reflecting higher material quality and compliance with fire safety standards.
- Cable-specific pricing: Fire-resistant cables compatible with these trays, such as LSZH or FM-certified cables, are sold in rolls of 150–500 meters, with prices listed in USD including taxes, and vary by shielding and voltage rating.
