

Price of installing long-distance optical cables

Summary of Content

Long-distance optical fiber cable costs typically range from \$0.10 to \$6 per foot for materials, with total installed costs reaching \$1 to \$3 per foot or more depending on distance, cable type, and installation complexity.

Material Costs

The base cost of fiber optic cable depends on fiber type, strand count, and construction:

- Single-mode fiber (OS2): \$0.10–\$0.50 per foot for standard outdoor cable; ideal for long-distance networks due to low attenuation .
- Multimode fiber (OM3/OM4): \$0.30–\$1.00 per foot, more expensive due to wider cores and higher manufacturing precision .
- High-strand-count cables: A 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot .
- Armored or direct-burial cables: \$0.50–\$5 per foot, providing protection against environmental hazards or rodents .
- Bulk or wholesale purchases: Prices can drop to \$0.09–\$1.52 per foot for single-mode fiber when buying in large quantities .

Installation and Labor Costs

Installation is often the largest component of total cost, especially for long-distance runs:
