

Price of ribbon-like bundled optical cables

Summary of Content

Ribbon and bundled optical fiber cables typically cost between \$0.09 and \$6 per foot, depending on fiber count, type, and construction.

Ribbon Fiber Optic Cables

Ribbon cables consist of multiple fibers arranged in a flat, parallel structure, allowing high fiber density and mass fusion splicing, which reduces installation time and labor costs. They are ideal for data centers and high-density applications. Ribbon cables can reduce cable diameter by up to 60% and preparation time by up to 30% compared to loose tube designs. Typical pricing for ribbon cables varies widely:

- Low-count ribbons (12–24 fibers): \$0.50–\$1.50 per foot
- High-count ribbons (up to 288 fibers): \$3–\$6 per foot
- Pre-terminated or factory-assembled ribbon cables: higher due to connectorization and labor savings

Bundled Optical Fiber Cables

Bundled cables group multiple individual fibers into a single sheath without the flat ribbon structure. They are more flexible and easier to handle in certain installations but may require individual splicing, which can increase labor costs. Pricing depends on fiber count, type, and environmental rating:

- Single-mode fiber (OS2): \$0.10–\$0.50 per foot
- Multimode fiber (OM3/OM4): \$0.30–\$1.00 per foot
