

Price of waterproof sockets and distribution boxes for construction sites

Summary of Content

Waterproof sockets and distribution boxes for construction sites typically range from \$50 to \$400 depending on voltage, current capacity, and IP rating.

Price Overview

- Basic IP65 wall-mounted distribution boxes with 2–3 standard sockets and residual current protection generally cost \$50–\$120. These are suitable for small construction setups and provide protection against rain, dust, and splashes .
- Industrial-grade mobile distribution boxes with multiple CEE sockets (16–32A), built-in circuit breakers, and IP65–IP67 protection are priced around \$200–\$400. These are designed for heavy-duty construction sites, outdoor events, or industrial projects, offering superior weather resistance and safety features .
- High-capacity three-phase distribution boxes for large-scale operations or high-power machinery can exceed \$400, depending on the number of outlets, amperage, and additional safety features like fuses and leakage protection .

Key Features Affecting Price

- IP Rating: IP65 provides protection against dust and water jets, while IP67 offers full protection against temporary immersion in water, increasing cost .
- Voltage and Current Capacity: Single-phase 110–250V boxes are cheaper, whereas three-phase 400V or high-current 32A boxes are more expensive .
- Safety Features: Integrated circuit breakers, fuses, and leakage protection devices add to the price but are essential for construction site safety .
