

Price per meter of 4-core optical cable

Summary of Content

The price of a 4-core optical cable typically ranges from \$0.40 to \$1.80 per meter, depending on type, construction, and application.

Price Range and Factors

The cost of a 4-core fiber optic cable varies based on several factors:

- **Cable Type:** Single-mode (OS1/OS2) cables, designed for long-distance transmission, are generally more expensive than multimode (OM3/OM4) cables used for shorter runs within buildings or campuses .
- **Construction:** Armored or outdoor-rated cables with water-blocking or gel-filled tubes cost more than standard indoor PVC-jacketed cables .
- **Material Quality:** High-purity silica glass fibers and durable jackets increase the price .
- **Length and Bulk Orders:** Buying in bulk (e.g., over 1,000 meters) often reduces the per-meter cost . Typical pricing examples include:
 - Indoor distribution multimode cables: Around \$0.40 per meter .
 - Ruggedized outdoor or armored cables: Up to \$1.80 per meter .
 - Single-mode OS2 4-core cable (100-meter reel): Approximately \$60-\$90, depending on customization and order volume .
 - Wholesale bulk purchases: \$0.09 to \$1.52 per foot (\$0.30-\$5 per meter), depending on fiber type, jacket, and application .

Additional Considerations
