

Price quote for indoor fiber optic cables for low-voltage applications

Summary of Content

Indoor fiber optic cables for low-voltage applications typically cost between \$0.05 and \$0.60 per meter, depending on fiber type, core count, and construction.

Typical Pricing

- Simplex/Duplex Indoor Cable: \$0.05 – \$0.30 per meter, suitable for short indoor runs and low-voltage applications (PVC or LSZH jacket) .
- Multimode Fiber (OM1/OM2/OM3): \$0.10 – \$0.60 per meter, commonly used for building backbones or high-speed LAN connections .
- Single-Mode Indoor Cable: \$0.10 – \$0.50 per meter, ideal for longer indoor runs or future-proofing networks .
- Armored Indoor Cable: \$0.30 – \$1.00 per meter, provides extra protection in high-traffic areas or where mechanical damage is possible . For bulk purchases, wholesale pricing can reduce costs further, with some suppliers offering \$0.09 to \$1.52 per foot depending on fiber count and cable type . Pre-terminated assemblies or patch cables incur higher costs due to factory termination and connector type .

Factors Affecting Cost

- Fiber Count: Higher core counts (e.g., 24-core or 96-core) increase material costs compared to 2-core or 4-core cables .
- Jacket Material: Indoor cables typically use PVC or LSZH jackets, which are cheaper than outdoor-rated PE or UV-resistant jackets .
