

Price quote for long-distance optical transceivers SFP

Overview

The SFP module price generally ranges from \$15 to \$30 for standard 1G and 10G third-party transceivers. In contrast, Original Equipment Manufacturer (OEM) modules from brands like Cisco, Juniper, or Arista with identical technical specifications typically cost between \$150 and. Understanding Optical transceiver Pricing helps procurement, network planning, and total cost-of-ownership decisions. This article compares typical cost ranges across speeds and transceiver types, explains why prices vary, and gives practical guidance for choosing the right optics for a given. Transceivers are essential components of every fiber optic network. They enable fiber optic transmission through one strand of fiber (simplex) or a pair of strands (duplex), as well as via CWDM and DWDM systems. They operate in either single or multi mode. 25G modules supporting 1000BASE-SX/LX/ZX/BX standards for multimode and single-mode fiber. FS provides 50/25/10/1G transceivers modules in SFP/SFP28/SFP56/QSFP28 form factor, supporting transmission distances from 30m to 160km over SMF/MMF fiber and enabling low power and cost-effective connectivity solutions.
