

Price quote for low-voltage fiber optic cable

Summary of Content

Low-voltage fiber optic cables typically range from \$0.05 to \$6 per foot depending on fiber type, strand count, and construction, with pre-terminated assemblies costing more.

Typical Pricing

- Single-mode fiber (OS2): \$0.10 to \$0.50 per foot for standard indoor cables; outdoor or armored versions may cost \$0.30 to \$2.80 per meter depending on strand count and protection level .
- Multimode fiber (OM3/OM4): \$0.30 to \$1.50 per foot for standard indoor runs; high-performance or armored cables can reach \$6 per foot .
- Pre-terminated or patch cables: Factory-terminated assemblies are more expensive due to labor and connector type, often adding \$0.50 to \$2 per foot .
- Armored cables: Designed for harsh environments or direct burial, typically \$0.50 to \$5 per foot, depending on protection and fiber count .

Factors Affecting Cost

- Fiber Count: Higher strand counts increase cost proportionally. For example, a 12-strand cable may cost \$0.50 per foot, while a 24-strand cable can reach \$1 per foot .
- Cable Construction: Indoor riser-rated cables are cheaper than plenum-rated or outdoor UV-resistant cables. Armored or direct-burial cables add 20-50% to the base cost .
