

Prices of Drop Fiber Optic Cables and Fiber Optic Cables

Summary of Content

Fiber optic cables typically cost \$1 to \$6 per linear foot, while FTTH drop cables can be as low as \$0.13 per foot, with prices varying by fiber type, strand count, and construction.

Fiber Optic Cable Pricing

Material Costs: Standard fiber optic cables range from \$1 to \$6 per linear foot depending on fiber count, type, and construction. Wholesale bulk purchases can be lower, around \$0.09 to \$1.52 per foot, while retail prices are higher due to packaging and pre-termination. Single-mode fiber is generally cheaper per foot (\$0.10–\$0.50) than multimode fiber (\$0.30–\$1.00), but single-mode requires more expensive equipment.

Strand Count: Higher fiber strand counts increase costs proportionally. For example, a 12-strand cable costs about \$0.50 per foot, while a 24-strand cable can reach \$1 per foot. Large backbone cables with 288 strands may cost up to \$6 per foot.

Construction and Rating: Indoor riser-rated cables are cheaper than plenum-rated cables. Armored cables for harsh environments or direct burial applications cost \$0.50 to \$5 per foot and provide extra durability. Outdoor cables with UV-resistant jackets or PE jackets are priced higher than indoor PVC or LSZH jackets.

Installation Costs: Commercial building installations with 100–200 network drops typically range from \$15,000 to \$30,000, while underground projects can cost \$5,000–\$20,000 per mile and aerial installations \$40,000–\$60,000 per mile. Installation complexity, terrain, and project scope significantly affect total costs.
