

Prices of Single-Mode and Dual-Mode Fiber Optic Lines

Summary of Content

Single-mode fiber typically costs \$0.10–\$0.50 per foot, while multimode fiber ranges from \$0.30–\$1.00 per foot, with total project costs influenced by strand count, installation, and environmental factors.

Material Costs

- **Single-Mode Fiber (SMF/OS2):** Costs approximately \$0.10 to \$0.50 per foot for the cable itself, depending on strand count and construction type . It is ideal for long-distance applications, supporting transmissions up to 40–100 km without amplification .
- **Multimode Fiber (MMF/OM3-OM5):** Typically costs \$0.30 to \$1.00 per foot, with higher costs for higher-performance OM4 or OM5 cables . Multimode fiber is optimized for short-distance, high-speed runs, usually under 500 meters, such as within data centers or LANs .

Factors Affecting Pricing

- **Strand Count:** More strands increase cost proportionally. For example, a 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot .
- **Cable Construction:** Indoor riser-rated cables are cheaper than plenum-rated cables. Armored or direct-burial cables for harsh environments can range from \$0.50 to \$5 per foot .
