

Prices of galvanized cable trays in the Middle East

Summary of Content

Galvanized cable trays in the Middle East typically range from \$15 to \$50 per meter, depending on type, size, and galvanization method.

Price Overview

The cost of galvanized cable trays varies based on material, dimensions, and manufacturing process. Standard hot-dip galvanized trays or pre-galvanized trays are commonly used in industrial, commercial, and residential projects. Typical price ranges are:

- Hot-dip galvanized cable trays: \$25–\$50 per meter, offering superior corrosion resistance for outdoor or humid environments (UAE suppliers like Emerald Steel Industries and Ruwais Steel provide these options)
- Pre-galvanized (GI) cable trays: \$15–\$35 per meter, suitable for indoor or less corrosive environments (available from suppliers such as Gooxoom and Bonn Group)

Factors Affecting Price

- Tray Type: Ladder, perforated, or solid-bottom trays influence cost; perforated trays are slightly cheaper due to less material usage.
- Dimensions: Widths (50–1200 mm), depths (50–300 mm), and lengths (900–3000 mm) affect material requirements and price. Larger trays cost more.
- Material Quality: Steel grade (S275 JR, A36, or stainless steel variants) and zinc coating thickness impact durability and price.
