

Protective tube for ribbon fiber optic cable joints

Overview

A fiber protection sleeve is a heat-shrinkable tube that encases and protects optical fiber splices from mechanical damage, moisture, and environmental stress. After the fusion splicing process, the protection sleeve reinforces the joint, ensuring long-term performance and. This guide is tailored to help you source the right fiber protection sleeve for ribbon fiber applications, understand their construction, applications, and what factors matter most when choosing a reliable manufacturer or supplier. With fast shrink time. Flexible, inflammable optical fiber protection tube, 7. The FP series is the industry standard for durable and lasting protection of single fiber splices in field installations, while the FP-04 (T) and FP-05 provide the same durable protection for.
