

Quotation for 1U Cold Aisle Server Rack Project in Iran

Summary of Content

A 1U cold aisle server rack project in Iran can be sourced from vendors like ServerBasket, TIAM Networks, and Coolnet, with pricing depending on server configuration, containment system, and installation services.

1U Rack Servers

For the server component, Dell 1U rack servers are widely available in Iran and can be customized to meet specific performance requirements. These servers feature Intel Xeon processors, high-speed RAM, NVMe storage, and integrated RAID controllers for secure and high-performance operations. Popular models include Dell R620 and R740, which support RDIMM, LRDIMM, or NVDIMM memory modules and offer remote management via iDRAC for efficient monitoring and maintenance. Vendors like ServerBasket provide competitive pricing, timely delivery, and technical support for configuration and deployment in Iran .

Cold Aisle Containment

To optimize cooling efficiency and energy management, a cold aisle containment system is recommended. Systems available in Iran, such as those from TIAM Networks and iranexpertparts, are modular, scalable, and retrofittable, allowing isolation of hot and cold aisles to maximize cooling efficiency and reduce energy consumption by up to 50%. These systems include tempered glass top panels, skirt-type blanking panels, and cable management options, and are designed to work with raised floors for optimal cold air intake . Customization is available based on the data center's physical conditions, power requirements, and environmental constraints.
