

Quote for Fiber Optic Enterprise Router SFP

Summary of Content

A project quotation for fiber optic enterprise routers with SFP modules should include device specifications, SFP module types, transmission distances, installation costs, and vendor support options.

Key Components for Quotation

1. Enterprise Routers: Select routers that support fiber connectivity and SFP modules. Enterprise routers often provide high-speed uplinks, VLAN support, and remote management capabilities. For example, P2P active fiber SFP routers and GPON ONTs are suitable for enterprise and campus networks, supporting standards like IEEE 802.11AX and ITU-T G.987/G.988 for high-capacity fiber deployments (). 2. SFP Modules: SFP modules are critical for fiber links. Choose modules based on:

- Data rate: Options range from 1.25G to 400G depending on network requirements ().
 - Fiber type: Single-mode for long-distance, multi-mode for short-distance connections.
 - Distance: Modules are available for short, medium, and long-distance links.
 - Compatibility: Ensure modules match router or switch ports and support low-latency, stable transmission ().
3. Network Design Considerations:
- Determine the number of routers and SFP modules required per site.
 - Include cabling, patch panels, and any passive infrastructure.
