

Rack-mounted PDUK10 FOB Price

Summary of Content

The exact FOB price for the PDUK10 is not publicly listed online and typically requires direct inquiry with the manufacturer or authorized distributor.

The PDUK10 is a rack-mounted power distribution unit (PDU) designed for 10" racks, often featuring multiple outlets (commonly 4-10), industrial-grade metal housing, and integrated circuit protection for server or network equipment . Pricing for such PDUs varies based on outlet count, amperage rating, plug type, and optional features like switches or surge protection . To obtain the FOB price, you should:

- Contact the manufacturer or authorized distributor directly, providing the quantity and shipping port.
- Request a formal quotation, as FOB pricing depends on the shipping location, order volume, and any applicable taxes or duties.
- Compare similar models (e.g., 10-outlet 1U rack PDUs) to estimate a price range, which typically falls between \$50-\$150 per unit for standard 10" rack PDUs . For procurement, also consider shipping costs, lead times, and warranty terms, as these can affect the total landed cost beyond the FOB price.
